High level of safety...
...unlimited comfort

Convincing facts and features

Modern and extremely stable:
Our care beds are available in two versions, the **Scintilla 1000** and the **Scintilla 2000**.
Both models are characterised by their enormous stability, which is guaranteed even in the highest position.
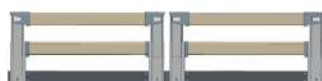

Safety and protection:
Both models can be fitted with full-length or separable side rails.
The full-length side rails can be raised to the highest position with little effort. The separated versions
have an intermediate stop, which can be used as a stand-up aid or as a guide for the patient. The side rails
are available in three versions:

Full-length side rails   Separable side rails ½ + ½   Separable side rails ⅔ + ⅓

Incomparably solid...

Scintilla 1000

Comfort:
The height of the care bed can be adjusted thanks to the very stable X-scissor design. Even in the highest position the care bed ensures stability. The care bed can be easily moved to any position using the remote control. The **Scintilla 1000** provides support when getting up and helps with the transfer.
To offer even more comfort, the grid frame is also available with an optional ergonomic panel system.

Work ergonomics:
The **Scintilla 1000** care bed is a safe and stable bed that can be adjusted conveniently to the correct working height. The remote control can be locked with a key. The backrest has a virtual pivot point that prevents shearing forces on the coccyx. All additional options as shown in the catalogue can be attached to the care bed on request. All Funke Medical care beds are also double braked. This makes it easy to move a bed that is tilted in the room.

Economic efficiency:
The **Scintilla 1000** is made from high-quality materials and guarantees a long service life. The adjustment options of the **Scintilla 1000** are designed to increase the patient's independence. The care bed can be customised to suit current needs. The **Scintilla 1000** fulfils the European legal regulations and is CE certified according to the MDR 2017/745. In addition, the care beds are TÜV tested. Our care beds do not only offer comfort and stability, but can be customised to suit any room and taste due to our various design options.

Your care...

...is our mission

Scintilla 2000 - perfect symbiosis of function und design

Comfort:

The **Scintilla 2000** care bed can be adjusted using a very stable Y-scissor construction. Thanks to a technical refinement, the care bed can be transformed into a luxurious armchair. In this comfort setting patients can, for example, have breakfast or watch television in an upright position. The care bed also offers a low access height of only 25 cm and the luxurious cover on the wheels creates an elegant flair.

Work ergonomics:

With its ease of use and many functional options, the **Scintilla 2000** makes care easier. Special attention has been paid to patient safety with this care bed. In addition, this care bed can be equipped with a 10-button remote control that allows the anti-Trendelenburg function and the Trendelenburg function to be set using a single button. Of course, additional options are available for this care bed.
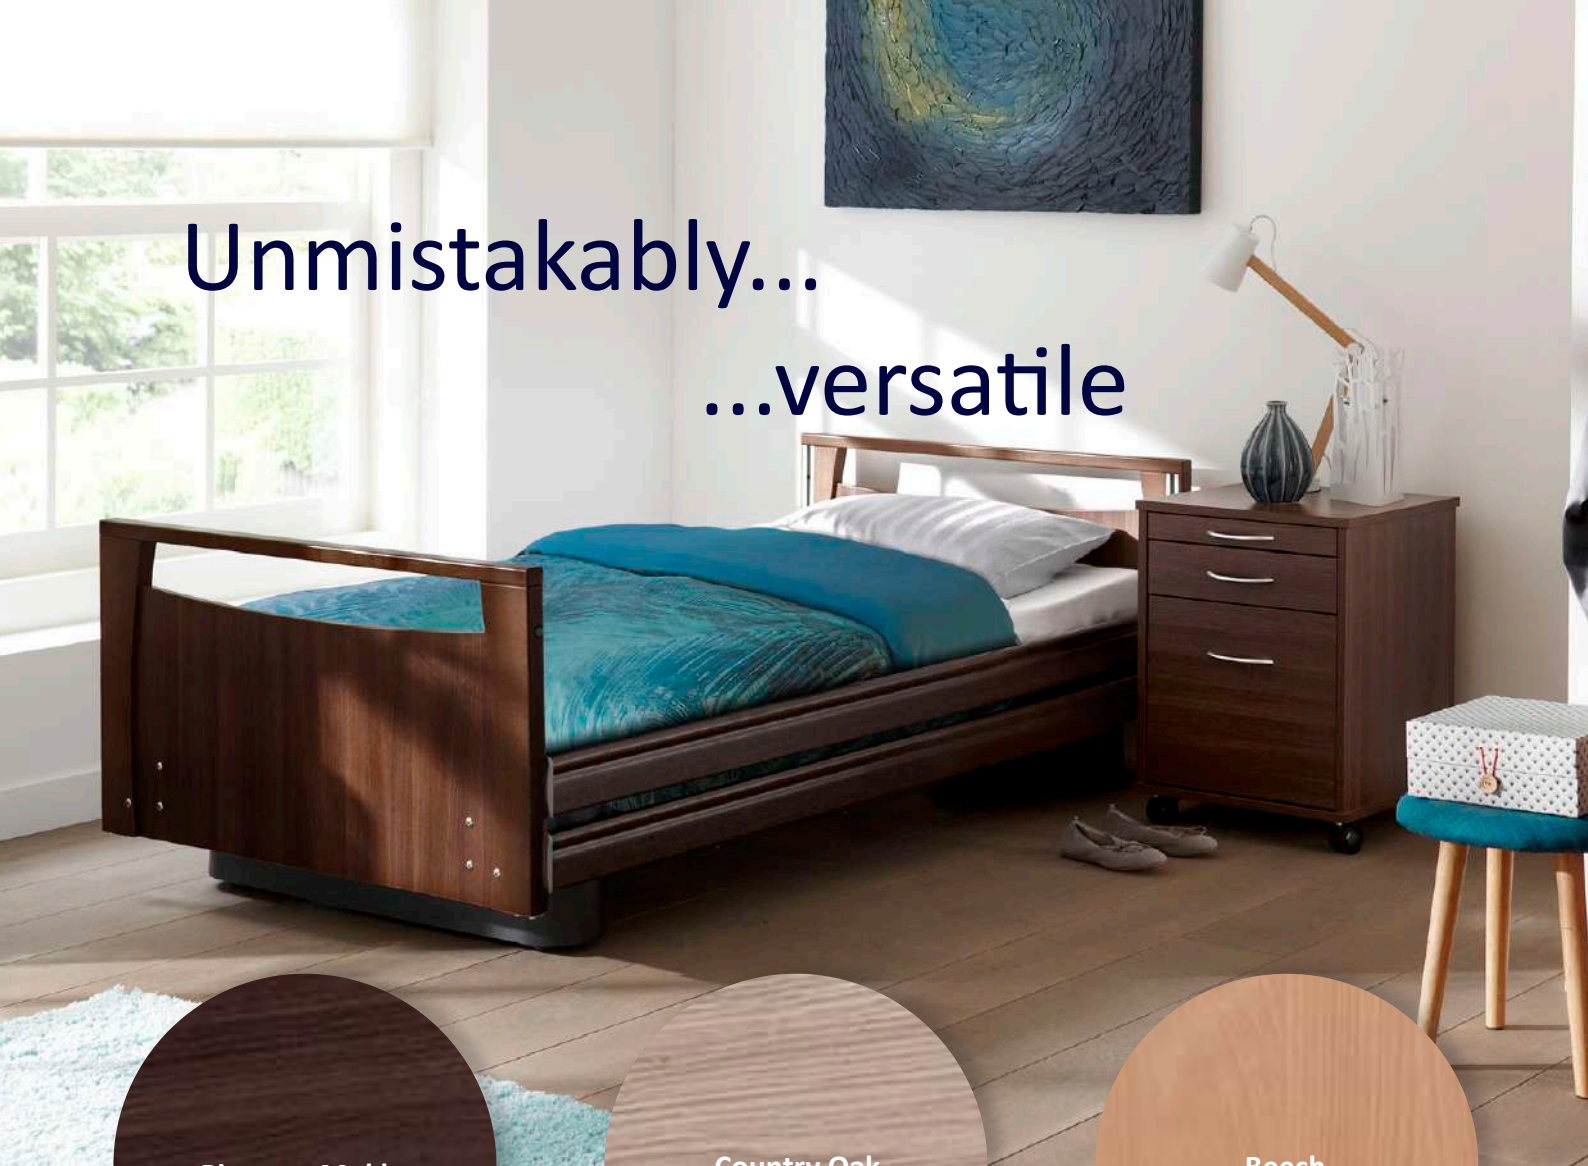

Economic efficiency:

The high-quality materials of the **Scintilla 2000** guarantee a long service life. Thanks to a variety of options the **Scintilla 2000** care bed makes it possible to take care of a larger group of patients. The **Scintilla 2000** fulfils the European legal regulations and is CE certified according to the MDR 2017/745. In addition, the care beds are TÜV tested. Besides safety and stability, the **Scintilla 2000** has a design that blends harmoniously into the room.
