

TRACKS FOR LUNA® CEILING LIFT

Discreet and elegant tracks for ceiling and wall mounting, made from recycled aluminum.

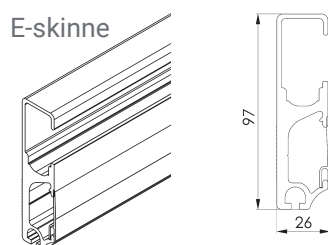

WinnCare's track systems represent a whole world of flexible, robust tracks that are easy to install. We offer a wide range of track systems that meet the varying and challenging needs of today's healthcare sector.

The small and strong low-profile track, T85, at 85 mm, has a low weight and optimal span and is easy to install.

The T125 track, at 125 mm, has the largest span of all WinnCare tracks and can be used as a continuous track together with our unique transition gate.

The E-track is unique because it is a wall-mounted track solution. The E-track is a flat and discreet wall track and a preferred alternative to the wall and ceiling mounts commonly used. Additionally, the E-track is easy and quick to install, making it the preferred choice for home care and institutions.

Regardless of the system setup requirements, all WinnCare tracks can work together as a total solution, ensuring easy installation and use.

ITEM NUMBERS

Model	Length	Item no.
T85	4,3 m	016-01271
T85	5,5 m	016-01272
T85	7 m	016-01273
T125	4,3 m	016-01276
T125	5,5 m	016-01277
T125	7 m	016-01278
E-track	4,3 m	016-01028
E-track	5,5 m	016-01029
E-track	7 m	016-01027

ACCESSORIES

If you need a room-to-room solution or if two tracks need to cross each other, WinnCare offers a selection of accessories, including:

- Switch track
- Powered turntable
- Transition gate (electric or manual)
- e-Station (track with built-in charging function)

HIGHLIGHTS

- Can be mounted on the ceiling or wall.
- Discreet and easy to install in various setups.
- The profiles can be combined to optimize solutions.
- Clean and simple design.

SUSTAINABLE PATIENT TRANSFER

Our tracks are made from recycled aluminum consisting of 75% recycled post-consumer aluminum scrap, extruded using 100% renewable energy.

By manufacturing our tracks from this type of aluminum, we can reduce our CO2 emissions by up to 66% on a standard track setup at scope 3 level, thereby contributing to a greener and more sustainable future.
